# About Us

Vintage Millwork is a family owned and operated moulding, millwork and pocket door frame manufacturer located in Atlanta, GA. Established in 1974, the company originally focused solely on the dentil moulding and pocket door frame industry, where it became an industry leader with quality products shipping all over the United States on a daily basis. The company added a moulder in the 1990's and shifted more focus onto the custom architectural mouldings that we continue to offer today. After some down years, Jay Patel purchased the company in 2007 hoping to bring renewed vigor to the Vintage Millwork brand. During the economic downturn of the late 2000's, the company was moved to its location today. Vintage Millwork is located off of I-20, I-285 and Fulton Industrial Blvd - we believe our strategic location as a premier moulding manufacturer located near the interchange of two major interstates in the greater Atlanta area allows us to effectively serve customers throughout the state and region.

Our specialty is in the manufacturing of both standard and custom mouldings in any desired species without minimum run quantities. We also continue to offer our industry-leading dentil mouldings and pocket door frames. We hope we can provide our products for you so please look through our catalog to learn more of what we can offer. Please do keep in mind that these are just a fraction of what we can offer – the profiles contained within these pages simply represent the architectural foundation of homes across Atlanta and the Southeast that have been gathered over the years. With our in-house knife grinding machine, we can match existing mouldings or drawings and furnish products within a matter of days. For more details, please contact us directly. As a family owned company, we pride ourselves on our quality and customer service. We would like to thank you for taking the time to learn a little more about us and hope to hear from you soon.

# S4S Lumber

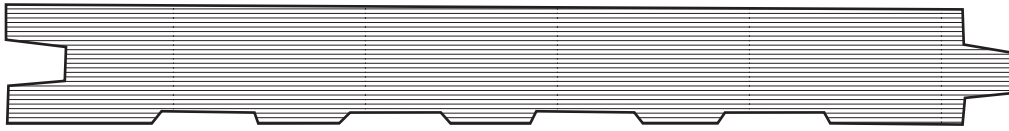

We can custom mill S4S (“Surfaced 4 Sides”) dimensional lumber to meet your needs; in the table below you will find those dimensions most commonly requested. Keep in mind that nominal sizes can also include 5/4 boards and 2” boards. Contact us for special requests – we have the ability to mill boards from 1/4” to 4” thick and up to 12” wide and anything in between. Custom sizes are our specialty!

Nominal Size	Actual Size
1” x 2”	3/4” x 1-1/2”
1” x 4”	3/4” x 3-1/2”
1” x 6”	3/4” x 5-1/2”
1” x 8”	3/4” x 7-1/4”
1” x 10”	3/4” x 9-1/4”
1” x 12”	3/4” x 11-1/4”
Custom	Custom

Additionally, for any S4S lumber orders, we can add rabbets or dados to meet your needs at no extra charge. Just let us know the details and we’ll be sure to get it done.

# Paneling

Similar to our S4S boards, we can custom mill Tongue & Groove and Ship Lap boards to meet your paneling or flooring needs; in the table below you will find those dimensions most commonly requested. Keep in mind that nominal sizes can also include 5/4 boards and 2" boards. Contact us for special requests – we have the ability to mill boards from 1/4" to 4" thick and up to 12" wide and anything in between. Custom sizes are our specialty!

*Note: the actual size of the boards includes the 1/4" tongue on one side. Because of the tongue, the face size of the boards is 1/4" smaller than the standard S4S size. But we can customize these dimensions to fit your needs.*

Nominal Size	Face Size	Actual Size (w/ tongue)
1" x 2"	3/4" x 1-1/4"	3/4" x 1-1/2"
1" x 4"	3/4" x 3-1/4"	3/4" x 3-1/2"
1" x 6"	3/4" x 5-1/4"	3/4" x 5-1/2"
1" x 8"	3/4" x 7"	3/4" x 7-1/4"
1" x 10"	3/4" x 9"	3/4" x 9-1/4"
1" x 12"	3/4" x 11"	3/4" x 11-1/4"
Custom	Custom	Custom

We can also mill varying sizes of the actual tongue/groove from 1/4" thick to 3/4" thick.

In addition to the standard tongue & groove, we can mill Nickel Gap Tongue & Groove, V-Tongue & Groove, Center-V-Tongue & Groove as well as any other custom profiles.

Ship lap boards can also be used for paneling / flooring purposes. These can be milled per common nominal or custom sizes with varying overlap dimensions to create the look you desire.
